### INK SOL UV 1000

*—Ink Sol UV 1000 is specifically engineered to dissolve and deep clean oil based and UV curable ink off presses, anilox rollers and other surfaces.—*

Bensalem, PA (February 2008) — Advanced Ink & Chemical is pleased to announce “**Ink Sol UV 1000**”. Ink Sol UV 1000 provides optimum cleaning properties for the pressroom and can be used on anilox rollers and any other surface, including photopolymer plates. Ink Sol UV 1000 works equally well on oil-based and/or UV curable inks. Using a unique and proprietary formulation that has been designed to break down the resins used in all non-water based inks; Ink Sol UV 1000 will dissolve ink completely. Particularly with dried inks, most cleaners will only dissolve a portion of the ink itself, creating a major headache to clean up. This is especially important for anilox rollers as ink residue can quickly diminish an anilox’s ability to transfer the right amount of ink.

Ink Sol UV 100 is available in a variety of different container sizes and is also available in concentrated and fully mixed versions.

Ink Sol UV 1000 is environmentally friendly.

### About Advanced Ink & Chemical

Advanced Ink & Chemical is a manufacturer of water based specialty inks coatings as well as a full line of chemicals and cleaners for the pressroom. By offering specialty products like tactile coatings, fluorescent and security flexographic inks and premium inkjet inks, Advanced is a true resource to our customers.
