INK SOL WB 1000

—Ink Sol WB 1000 is specifically engineered to dissolve and deep clean water based ink off presses, anilox rollers and other surfaces.—

Bensalem, PA (February 2008) — Advanced Ink & Chemical is pleased to announce “**Ink Sol WB 1000**”. Ink Sol WB 1000 will provide the printer with a versatile, strong and fast acting cleaner. Ink Sol WB 1000 can be used on anilox rollers and any other surface, including areas where water based ink have dried. Using a unique and proprietary formulation that has been designed to break down and dissolve the resins used in all water based inks. Ink Sol WB 1000 will completely dissolve all components of the ink. This is an important attribute of the cleaner as water based inks are designed to dry fast and can subsequently quickly wreak havoc on anilox rollers, diminishing their ability to transfer the right amount of ink.

Ink Sol WB 100 is available in a variety of different container sizes and is also available in concentrated and fully mixed versions.

Ink Sol WB 1000 is environmentally friendly.

About Advanced Ink & Chemical

Advanced Ink & Chemical is a manufacturer of water based specialty inks coatings as well as a full line of chemicals and cleaners for the pressroom. By offering specialty products like tactile coatings, fluorescent and security flexographic inks and premium inkjet inks, Advanced is a true resource to our customers.
